JULY ARTICLE FOR HERALD-REPUBLICAN

Submitted by: Janet Bohney, Board President, Steuben County Lakes Council

The Steuben County Lakes Council has a scholarship fund to help the next generation move forward in their education in environmental issues and science. Our goal is to help the students of today keep the environment clean and safe for tomorrow. We hope these students come back to Steuben County with a desire to keep our beautiful lakes, waterways and natural environments clean and safe.

Luke Campbell is our scholarship recipient after graduating from Fremont High School in 2024. We are so glad that Luke chose to go to a college that is known for their environmental science. In Luke's own words, "The courses I've taken have not only expanded my knowledge, but ignited my passion for learning more than I didn't know I had,"

Looking ahead Luke is excited to be taking environmental science classes and GIS classes. These subjects align perfectly with his interest in conservation and the natural world.

We would like to thank our scholarship donors who help students like Luke move us forward. Without the scholarship donations, we might not be able to help our Steuben County students move us forward in our quest to keep "Our Waters Clean Today For Tomorrow."
